

LeLe – Learning Leadership

Dinard, France, 11-15 May 2015

Are you leading yourself? Do you sometimes have the feeling that beliefs are hindering you in doing what you want? Have you ever experienced how empowering beliefs can carry you forward? Do you know how to energize yourself? – Sign up and explore the interconnection between leadership and learning as generative engines your development and find ways to use all the energy you have.

In detail you will

- explore the connection between leadership and learning as generative engines for self and organisational development;
- look at how limiting beliefs can boycott the individual attitude towards learning and on how empowering beliefs can resource the individual in his/her quest for inner creativity for leadership;
- assess your individual leadership and learning profile;
- identify your key questions to address your quest for learning leadership as an ongoing non linear process;
- go out of your comfort zone to unleash the generative power of creating rapport with the others and to afford the experience of unlearning;
- learn about and experience balancing inner and outer energies as leadership resources.

Approach

The course provides an opportunity for assessing the individual leadership and learning profile through an analysis of past experiences and their impact on your views to learning and leadership. It also offers a coached experience of going out of the comfort zone to unleash the generative power of creating rapport with the others and to afford the experience of unlearning.

The adaptive leadership and appreciative leadership models provide the framework for experiencing and learning key tools such as holding meaningful conversations, decision making processes, asking powerful questions, active listening and story telling.

The course consists of a mix of short theoretical inputs, concrete exercises, group discussions and solo moments. We believe that the best way to learn leadership is through having real experiences and enough reflecting time to get new insights and find ways to apply it to the everyday work.
